

Maze Madness · Redstone & Levers

Topic: Redstone Levers · **Course:** Maze Madness · **Level:** Intermediate · **Time:** about 35 minutes

The maze has a **lever**. Flip it with `interact` to open the redstone door, then walk to the goal.

1 · Predict 🧠

Write what the agent does.

```
move forward
interact ahead
move forward
```

The agent flips the lever. What happens to the door?

```
interact ahead
move forward
move forward
```

There is no lever in front. What happens?

2 · Plain to API

Match the plain words to the real code line.

Plain words	Code
flip the lever in front	<code>agent.move(FORWARD, 1)</code>
step forward one block	<code>agent.interact(...)</code>
is there redstone ahead?	<code>agent.detect(REDSTONE, FORWARD)</code>

Write each pair:

3 · Trace the Code 🔍

```
while not agent.detect(REDSTONE, FORWARD):  
    agent.move(FORWARD, 1)  
agent.interact(...)  
agent.move(FORWARD, 1)  
agent.move(FORWARD, 1)
```

What does the agent do? Write it in plain English.

4 · Fix the Bug 🐛

The agent should walk **up to** the lever, then flip it **once**. This flips on every step.

```
while not agent.detect(REDSTONE, FORWARD):  
    agent.move(FORWARD, 1)  
    agent.interact(...)
```

Write the fixed code:

One line: why was it wrong?

Open your homework world. Write code that:

1. moves the agent to the lever,
2. flips it with `interact` ,
3. walks through the open door to the goal.

Record **one video** — one take, no stopping (a phone is fine). Show these in order:

1 · Your code. Scroll through it. Say what each part does.

2 · Your build. Point the camera. Name the parts.

Fill the blanks:

Today I built _____.

I built it using this code: ____.

In this code I used _____.

The hardest part was _____.

That part was hard because _____.

The most fun part was _____.

Something new I learned was _____.

Write your lines here, then say them in your video.
