

Maze Madness · Final Cube Maze

Topic: Final Cube Maze · **Course:** Maze Madness · **Level:** Beginner · **Time:** about 25 minutes

Last lesson! Build a cube maze. Code the agent to solve it.

1 · Plan 🧠

Your maze needs:

- walls
- 1 door
- 1 lever
- start and finish

Where is the lever? Say it out loud.

2 · Circle 🧠

```
keep going until at goal:  
  if wall ahead:  
    turn right  
  else if lever ahead:  
    interact  
  else:  
    move forward
```

Agent sees a lever. Circle one: turn right · interact · move forward

3 · Fill One Blank

```
keep going until _____:
  if wall ahead:
    turn right
  else:
    move forward
```

Which fills the blank? Circle one: at goal · forever

4 · Show Your Work 📷 🎥

Build your final maze:

- **20 × 20 × 20** cube
- 1 door
- 1 lever
- start and finish
- code that solves it

Record **one video** — one take, no stopping (a phone is fine). Show these in order:

1 · Your code. Scroll through it. Say what each part does.

2 · Your build. Point the camera. Name the parts.

Say these out loud, filling in the blanks:

Today I built _____.

I built it using this code: _____.

In this code I used _____.

The hardest part was _____.

That part was hard because _____.

The most fun part was _____.

Something new I learned was _____.
