

🍔 3D Coordinates Extension — English Worksheet (Intermediate)

Topic: Finish the Burger (x, y) · **Course:** 3D Coordinates · **Level:** Intermediate (Extension, after Lesson 3) · **Time:** about 40 minutes

Open the world. One burger is **finished**. One is only **started** — it has a bottom bun and a tomato, nothing else.

Your job: **finish it**. Every block sits at (x, y) — x is how far **across**, y is how far **up**.

● Put a **red block at your feet** before you start. That is your **home spot**. Stand on it every run, or the burger moves too.

🍔 On the wall now — bottom bun · tomato

1 · Predict 🌟

Read each set of steps. Write a sentence about what you will see.

```
place red block at (2, 4)
place red block at (3, 4)
place red block at (4, 4)
```

Three red blocks share $y = 4$. What shape do they make, and which number stays the same?

```
place brown block at (8, 9)
place brown block at (8, 10)
place gold block at (8, 11)
```

These three share $x = 8$. What shape do they make, and which number changes?

```
place green block at (7, 7)
place yellow block at (7, 7)
```

Two blocks aim for the same (x, y) . What do you see — green, yellow, or both? Why?

2 · Spot the Bug 🐛

Each code block is broken. Read what it should do, fix it, then explain why the original was wrong and your fix works.

Bug A — The yellow cheese belongs **above** the lettuce, at **y = 8**. This block lands on the tomato at **y = 4**.

```
place yellow block at (2, 4)
```

Write the fixed code:

Why was it wrong? Why does your fix work?

Bug B — The bun's left edge should sit at **(2, 12)**. The two numbers are **swapped**, so it lands in the wrong place.

```
place gold block at (12, 2)
```

Write the fixed code:

Why was it wrong? Why does your fix work?

3 • Show Your Work 📷 🎥

Stand on your **home spot** (the red block). Finish the burger row by row, reading each square's (x, y) — **x** across the top, **y** down the side.

🍔 **The finished burger** — bun • gold, patty • brown, cheese • yellow, lettuce • green, tomato • red, crust • black

Before you build. The gold bun row at **y = 12** starts at one x and ends at another. Write both here.

Record **one video** — one take, no stopping (a phone is fine). Show these in order:

1 • Your code. Scroll through it. Say what each part does.

2 • Your build. Point the camera. Name the parts.

Fill the blanks:

The first thing I did was count from left to right. The first number was _____ and the last was _____. This is the **x** axis.

The second thing I did was count down and up. The first number was _____ and the last was _____. This is the **y** axis.

The hardest thing was building the _____.

It was hard because _____.

I think the burger looks _____.

The most fun part was _____.

Something new I learned was _____.

Write your lines here, then say them in your video.
