

3D Coordinates · Recreate 2 Mob Heads (x, y, z) — English Worksheet (Beginner)

Topic: Recreate 2 Mob Heads (x, y, z) · **Course:** 3D Coordinates · **Level:** Beginner · **Time:** about 30 minutes

Two blocky **mob heads** stand in your world — each a cube with a face on the **front**. Every block uses **(x, y, z)** — x **across**, y **up**, z **deep**.

● Stand on your **home spot** (red block) every run. Move your feet, move your head.

1 · Predict

Read the code. Circle one word.

```
place green block at (0, 4, 1)
place green block at (0, 4, 2)
```

Only z changes (1 → 2). Circle one: across · up · deeper

```
place green block at (0, 4, 1)
place green block at (0, 5, 1)
```

Only y changes (4 → 5). Circle one: across · up · deeper

2 · Spot the Bug 🐛

An eye should be on the **front** at $z = 1$ — the face only shows there.

```
# broken  
place black block at (2, 5, 2)
```

Fill the blank to put the eye back on the front:

```
place black block at (2, 5, __)
```

Which number fills the blank? Circle one: 1 · 2

Why was it wrong? Circle one: z was 2, so the eye went to the side · the color was wrong

3 · Show Your Work 📷 🎥

Build this small green cube head and add **two eyes** on the front. Stand on your home spot first.

```
fill green block from (0, 4, 1) to (2, 6, 2)
place black block at (0, 5, 1)
place black block at (2, 5, 1)
```

This is a **3×3 front, 2 blocks deep**, with two eyes on the front.

Record **one video** — one take, no stopping (a phone is fine). Show these in order:

1 · Your code. Scroll through it. Say what each part does.

2 · Your build. Point the camera. Name the parts.

Say these out loud, filling in the blanks:

Today I built ____.

I built it using this code: ____.

In this code I used ____.

The hardest part was ____.

That part was hard because ____.

The most fun part was ____.

Something new I learned was ____.
