

Functions & Games · Functions with Parameters & Returns — English Worksheet (Beginner)

Topic: Functions with Parameters & Returns · **Course:** Functions & Games · **Level:** Beginner · **Time:** about 30 minutes

This lesson you give a function a **parameter** — a number it uses inside.

1 · Predict

```
define build_tower(height):  
    repeat height times:  
        place block  
        move up  
  
build_tower(3)
```

Is the tower 3 blocks tall? Circle one: yes · no

Why? Circle one: repeat runs 3 times · repeat runs 1 time

```
define build_tower(height):  
    repeat height times:  
        place block  
        move up
```

No call after the definition. Does anything build? Circle one: yes · no

2 · Find the Difference 🐉

Pair A — The function should be **called** so the tower gets built.

```
# clean
define build_tower(height):
    repeat height times:
        place block
        move up

build_tower(3)
```

```
# buggy
define build_tower(height):
    repeat height times:
        place block
        move up
```

What is wrong? Circle one: no call line · wrong block

Pair B — The function should use the **parameter** `height`, not a fixed number.

```
# clean
define build_tower(height):
    repeat height times:
        place block
        move up
```

```
# buggy
define build_tower(height):
    repeat 3 times:
        place block
        move up
```

What is wrong? Circle one: uses `3` not `height` · missing call

3 · Fill the Gap

One word is missing.

```
define build_tower(height):  
    repeat height times:  
        place block  
        move up  
  
build_tower(____)
```

Fill the gap. Circle one: ☐ 5 · ☒ repeat · ☐ define

4 · Show Your Work 📷 🎥

Switch to your homework world. Write one tower function with a `height` parameter and call it two times with different numbers.

Record **one video** — one take, no stopping (a phone is fine). Show these in order:

1 · Your code. Scroll through it. Say what each part does.

2 · Your build. Point the camera. Name the parts.

Say these out loud, filling in the blanks:

Today I built _____.

I built it using this code: _____.

In this code I used _____.

The hardest part was _____.

That part was hard because _____.

The most fun part was _____.

Something new I learned was _____.
