

Pyramid Problems · Loops — English Worksheet (Beginner)

Topic: Loops · **Course:** Pyramid Problems · **Level:** Beginner · **Time:** about 30 minutes

1 · Predict 🧠

Read the steps. Circle your answer.

```
repeat 3 times:  
  place block down  
  move forward
```

How many blocks does the agent place? Circle one: 1 · 3 · 9

Line or tower? Circle one: line · tower

```
repeat 4 times:  
  place block down  
  move up by 1
```

Is this a line or a tower? Circle one: line · tower

How tall is it? Circle one: 2 · 4 · 8

2 · Find the Difference 🐛

Clean steps first, then a buggy version. Circle the bug.

Pair A — Should place a row of 4 blocks.

```
# clean
repeat 4 times:
  place block down
  move forward
```

```
# buggy
repeat 4 times:
  place block down
```

What is wrong? Circle one: all 4 blocks land in one spot · they form a line · they form a tower

Pair B — Should build a tower 4 blocks tall.

```
# clean
repeat 4 times:
  place block down
  move up by 1
```

```
# buggy
repeat 4 times:
  place block down
  move forward
```

What is wrong? Circle one: it builds a flat line, not a tower · it builds a taller tower · nothing happens

3 · Fill the Gap

Build a row of **5 blocks** with a loop. Fill the missing number and line.

```
repeat ____ times:  
  place block down  
  _____
```

Missing number? Circle one: 5 · 2

Missing line? Circle one: move forward · turn right

4 · Show Your Work 📷 🎥

Switch to your homework world. Use a loop to build a **10-block straight wall**.

Record **one video** — one take, no stopping (a phone is fine). Show these in order:

1 · Your code. Scroll through it. Say what each part does.

2 · Your build. Point the camera. Name the parts.

Say these out loud, filling in the blanks:

Today I built ____.

I built it using this code: ____.

In this code I used ____.

The hardest part was ____.

That part was hard because ____.

The most fun part was ____.

Something new I learned was ____.
