

RB001 Week 2 — English Worksheet (Beginner)

Topic: Variables — the Ghost Platform · **Course:** Obby Architect · **Level:** Beginner · **Time:** about 30 minutes

This week you learned **variables** — names that hold a value. With `local platform = script.Parent` you give the part a name, then use that name to change it.

1 · Predict 🧠

Read the script. Before you run anything, circle or write your answer.

```
local platform = script.Parent
platform.Transparency = 0.5
```

Can you see through the platform when the game runs? Circle one: yes · no

Why?

```
local platform = script.Parent
platform.CanCollide = false
```

A player jumps onto this platform. Do they stand on it? Circle one: yes · no

2 · Find the Difference 🐉

Each pair shows clean code first, then a broken version of the same idea. Circle what's different and write one short sentence about the bug.

Pair A — The platform should turn half see-through. Read the variable name very carefully.

```
-- clean
local platform = script.Parent
platform.Transparency = 0.5
```

```
-- buggy
local platform = script.Parent
platfrom.Transparency = 0.5
```

What is wrong?

Pair B — The platform should be **half** see-through, not invisible. Transparency goes from 0 to 1.

```
-- clean
local platform = script.Parent
platform.Transparency = 0.5
```

```
-- buggy
local platform = script.Parent
platform.Transparency = 50
```

What is wrong?

3 · Fill the Gap

The script should make a variable for the platform. One word is missing. Fill it in using the word bank.

```
____ platform = script.Parent  
platform.Transparency = 0.5
```

Word bank: local · print · Parent

Write the missing word:

The ghost platform should let players fall through. One word is missing.

```
local platform = script.Parent  
platform.CanCollide = ____
```

Word bank: false · true · local

Write the missing word:

4 · Tell Me What You Built 📷

Now switch to your own obby in Roblox Studio. Build a ghost platform trick section — some platforms are real, and some are ghosts that players fall through. When you finish, come back here.

Send a photo or video of your trick section, then explain what you did. Use these sentence starters — write 2 or 3 sentences.

I made a variable called ...

The ghost platform ...

One tricky moment was when ...

5 · Record Your Walkthrough 🎥

Take a video on your phone (or a parent's phone) while a player tries your trick section. Talk like you are teaching a friend. Try to use these words: **variable**, **local**, **Transparency**, **CanCollide**.

1. Run the game and fall through a ghost platform.
2. Read your `local platform = script.Parent` line out loud.
3. Say in your own words what a **variable** is.

Write what you will say in your video. You can read from it while filming.
