

RB003 Week 1 — English Worksheet (Beginner)

Topic: The Dropper — Making Parts with Code · **Course:** Tycoon Engineer · **Level:** Beginner · **Time:** about 30 minutes

This week your script **creates parts from code** using `Instance.new`. A dropper spawns ore again and again with a `while` loop and `task.wait`.

1 · Predict 🧐

Read the script. Before you imagine running it in Roblox Studio, circle or write your answer.

```
local ore = Instance.new("Part")
ore.Position = Vector3.new(0, 10, 0)
ore.Parent = workspace
```

The ore has a Parent. Does an ore appear in the game? Circle one: yes · no

Why?

```
local ore = Instance.new("Part")
ore.Position = Vector3.new(0, 10, 0)
```

This time the `ore.Parent` line is missing. Does an ore appear? Circle one: yes · no

2 · Find the Difference 🦎

Each pair shows clean code first, then a broken version of the same idea. Circle what's different and write one short sentence about the bug.

Pair A — The ore should **appear in the game**.

```
-- clean
local ore = Instance.new("Part")
ore.Position = Vector3.new(0, 10, 0)
ore.Parent = workspace
```

```
-- buggy
local ore = Instance.new("Part")
ore.Position = Vector3.new(0, 10, 0)
```

What is wrong? Why does the buggy ore never appear?

Pair B — The dropper should spawn one ore **every 2 seconds**, not freeze the game.

```
-- clean
while true do
    local ore = Instance.new("Part")
    ore.Parent = workspace
    task.wait(2)
end
```

```
-- buggy
while true do
    local ore = Instance.new("Part")
    ore.Parent = workspace
end
```

What is wrong?

3 · Fill the Gap

The ore should appear in the game. One word is missing. Fill it in using the word bank.

```
local ore = Instance.new("Part")  
ore.____ = workspace
```

Word bank: Parent · Size · Position

Write the missing word:

4 · Tell Me What You Built 📷

Now switch to Roblox Studio and open your tycoon. Build a dropper that spawns an ore every 2 seconds. When you finish, come back here.

Send a photo or video of your dropper spawning ore, then explain what you did. Use these sentence starters — write 2 or 3 sentences.

I used `Instance.new` to ...

My loop spawns a new ore every ...

One tricky moment was when ...

5 · Record Your Walkthrough 🎥

Take a video on your phone (or a parent's phone) while your dropper runs. Talk like you are teaching a friend. Try to use these words: **Instance.new**, **Parent**, **loop**, **task.wait**.

1. Show your dropper in Roblox Studio, then press Play.
2. Read your `while` loop out loud.
3. Say in your own words what `task.wait(2)` does.

Write what you will say in your video. You can read from it while filming.
