

RB003 Week 3 — English Worksheet (Beginner)

Topic: Arrays — A List of Upgrades · **Course:** Tycoon Engineer · **Level:** Beginner · **Time:** about 30 minutes

This week your tycoon gets an **array** — one variable that holds a whole list of upgrades. You grab items with an **index** like `upgrades[1]`.

1 · Predict 🧐

Read the script. Before you imagine running it in Roblox Studio, circle or write your answer.

```
local upgrades = {"Fast Dropper", "Gold Ore", "Mega Conveyor"}
print(upgrades[1])
```

Does it print `Fast Dropper` ? Circle one: yes · no

Why?

```
local upgrades = {"Fast Dropper", "Gold Ore", "Mega Conveyor"}
print(upgrades[4])
```

There is no item 4. Does it print an upgrade name? Circle one: yes · no

2 · Find the Difference 🦕

Each pair shows clean code first, then a broken version of the same idea. Circle what's different and write one short sentence about the bug.

Pair A — The script should print the **first** upgrade. Luau lists start at **1**.

```
-- clean
local upgrades = {"Fast Dropper", "Gold Ore", "Mega Conveyor"}
print(upgrades[1])
```

```
-- buggy
local upgrades = {"Fast Dropper", "Gold Ore", "Mega Conveyor"}
print(upgrades[0])
```

What is wrong? What does the buggy script print?

Pair B — A list needs **commas** between the items.

```
-- clean
local upgrades = {"Fast Dropper", "Gold Ore", "Mega Conveyor"}
```

```
-- buggy
local upgrades = {"Fast Dropper" "Gold Ore" "Mega Conveyor"}
```

What is wrong?

3 · Fill the Gap

The script should print the **first** upgrade, `Fast Dropper`. One number is missing. Fill it in using the word bank.

```
local upgrades = {"Fast Dropper", "Gold Ore", "Mega Conveyor"}  
print(upgrades[____])
```

Word bank: `1` · `0` · `4`

Write the missing number:

4 · Tell Me What You Built 📷

Now switch to Roblox Studio and open your tycoon. Make an `upgrades` array with 3 upgrades and print them to the Output window. When you finish, come back here.

Send a photo or video of your script and the printed list, then explain what you did. Use these sentence starters — write 2 or 3 sentences.

My array holds ...

I printed item 1 by ...

One tricky moment was when ...

5 · Record Your Walkthrough 🎥

Take a video on your phone (or a parent's phone) while you run your script. Talk like you are teaching a friend. Try to use these words: **array**, **index**, **list**, **nil**.

1. Show your `upgrades` array in the script.
2. Press Play and show the printed names in the Output window.
3. Say in your own words why lists in Luau start at 1.

Write what you will say in your video. You can read from it while filming.
