

RB005 Week 1 — English Worksheet

Topic: Design Your Game — One Mechanic, One Map · **Course:** Dream Game Studio · **Time:** about 45 minutes

This is YOUR game now. Before you build anything, you need a plan: what does the player **do**, and how do they **win**? Great games start small — **one mechanic, one map**.

1 · Think

Read each question. Write what you think before class.

A core loop is what the player does again and again. In tag, the loop is: run → chase → tag → run again. What is the loop in an obby (jumping game)?

A win condition tells the player when they are done. Imagine a game with no win condition — it just never ends. Why might players quit a game that never says "You win!"?

You have 4 weeks. Game A has one mechanic and one map. Game B has pets, 100 levels, and an open world. Which one will actually be FINISHED in 4 weeks? Why?

2 · Fix the Design 🦎

A student wrote this design. It sounds amazing — and it is way too big to ever finish.

My game: An open world with 100 levels, a pet system, a shop, multiplayer battles, and a city you can build yourself.

Your job: cut it down to **one mechanic, one map**.

Which ONE part would you keep for version 1? Why that one?

Rewrite the design as one sentence with one mechanic and one map. (Shape: "Players ___ to ___ on one ___ map.")

The cut features are not deleted forever — they go on a "later list." Why is a later list better than trying to build everything now?

3 · Tell Me What You Built 📷

Now write YOUR design doc — on paper or in a doc. It needs four things: your game in **one sentence**, the **loop** (what the player does every 30 seconds), the **win condition**, and **3 dream features** with a circle around the ONE you will build for version 1.

Send a photo or video of your design doc, then explain it here. Use these sentence starters — write 4 to 6 sentences total.

My game in one sentence is ...

Every 30 seconds, the player ...

You win when ...

My three dream features are ...

For version 1, I circled ... because ...

If version 1 goes well, next I would add ...

4 · Record Your Walkthrough

Now take a video on your phone (or a parent's phone) and **pitch your game in 1 minute**, like you are selling it to a friend. Try to use these words: **mechanic, loop, win condition, version 1, player**.

1. Say your game's name and your one-sentence idea.
2. Explain the loop: what the player does every 30 seconds.
3. Say the win condition.
4. Say which ONE feature you picked for version 1 — and why you cut the rest.

Write what you will say in your video. Use the space below to plan it before you record — you can read from it while filming.
