

M000 Week 1 — English Worksheet

Topic: Agent Movement · **Course:** Builder Basics · **Time:** about 45 minutes

1 · Predict 🧠

Read each set of steps. Before you imagine the agent doing it, write what you think will happen.

```
move forward
move forward
move forward
```

Where does the agent end up? Write one sentence.

```
move forward
turn right
move forward
turn right
move forward
turn right
move forward
turn right
```

What shape did the agent trace on the ground?

```
move forward
move up by 3
move forward
```

Is the agent higher, lower, or the same height as where it started?

2 · Spot the Bug 🐛

Each block of code below was meant to do something, but it is broken. Read what the code is **supposed** to do, then rewrite it so it works. After that, explain why the original was wrong and why your fix works.

Bug A — The agent is supposed to walk **5 steps forward**.

```
move forward  
move forward  
move forward
```

Write the fixed code:

Why was it wrong? Why does your fix work?

Bug B — The agent is supposed to walk forward, then turn right, then walk forward again.

```
move forward  
move forward  
turn right
```

Write the fixed code:

Why was it wrong? Why does your fix work?

Bug C — The agent is supposed to go forward 2 steps, then up 2 steps.

```
move forward  
move up by 2  
move forward
```

Write the fixed code:

Why was it wrong? Why does your fix work?

3 · Tell Me What You Built 📷

Now switch to your homework world. Move your agent in an **L-shape** path — go forward, turn, then go forward again (no loops this week). When you finish, come back here.

Send a photo or video of where the agent ended up, then explain what you did. Use these sentence starters — write 4 to 6 sentences total.

First, I told the agent to ...

Then I made it turn ...

The hardest part was ...

To fix it, I ...

The agent ended up at ...

If I had more time, I would ...

4 · Record Your Walkthrough 🎥

Now take a video on your phone (or a parent's phone) while you walk the camera through your world. Talk through it like you are teaching someone who has never seen it. Try to use these words: **forward, turn, up, down, agent**.

1. Show where the agent started.
2. Read your commands out loud one by one and say what each one does.
3. Show one bug you hit and how you fixed it.
4. Show where the agent ended up.

Write what you will say in your video. Use the space below to plan it before you record — you can read from it while filming.
