

M000 Week 2 — English Worksheet

Topic: Placing Blocks · **Course:** Builder Basics · **Time:** about 45 minutes

1 · Predict 🧠

Read each set of steps. Before you imagine the agent doing it, write what you think will happen.

```
place block down
move forward
place block down
move forward
place block down
```

How many blocks did the agent place? What does it look like?

```
place block down
turn right
move forward
place block down
```

Where are the two blocks compared to each other?

```
move up by 1
place block down
move up by 1
place block down
```

Are the blocks stacked, in a line, or floating? Explain.

2 · Spot the Bug 🐛

Each block of code below was meant to do something, but it is broken. Read what the code is **supposed** to do, then rewrite it so it works. After that, explain why the original was wrong and why your fix works.

Bug A — The agent is supposed to place a block, move forward, and place another block.

```
move forward  
place block down  
move forward
```

Write the fixed code:

Why was it wrong? Why does your fix work?

Bug B — The agent is supposed to place a row of 3 blocks in a line.

```
place block down  
place block down  
place block down
```

Write the fixed code:

Why was it wrong? Why does your fix work?

Bug C — The agent is supposed to place 2 blocks stacked on top of each other.

```
place block down  
move forward  
place block down
```

Write the fixed code:

Why was it wrong? Why does your fix work?

3 · Tell Me What You Built 📷

Now switch to your homework world. Place **5 blocks** in different positions, using **at least 2 different block types** (stone, dirt, wood — your choice). When you finish, come back here.

Send a photo or video of what you placed, then explain what you did. Use these sentence starters — write 4 to 6 sentences total.

First, I ...

I used the command ... to place the block.

Then I moved ... so the next block would land ...

The hardest part was ...

To fix it, I ...

If I had more time, I would ...

4 · Record Your Walkthrough 🎥

Now take a video on your phone (or a parent's phone) while you walk the camera through your world. Talk through it like you are teaching someone who has never seen it. Try to use these words: **place, block, move, forward, up.**

1. Show the blocks you placed.
2. Read your commands out loud one by one and say what each one does.
3. Show one bug you hit and how you fixed it.
4. Point out the block you are most proud of and say why.

Write what you will say in your video. Use the space below to plan it before you record — you can read from it while filming.
