

M001 Week 2 — English Worksheet (Beginner)

Topic: Loops · **Course:** Pyramid Problems · **Level:** Beginner · **Time:** about 30 minutes

1 · Predict 🧠

Read the steps. Before you imagine the agent doing it, circle or write your answer.

```
repeat 3 times:  
  place block down  
  move forward
```

How many blocks does the agent place? Circle one: 1 · 3 · 9

What does it look like — a line or a tower?

```
repeat 4 times:  
  place block down  
  move up by 1
```

Is this a line on the ground or a tower? Circle one: line · tower

How tall is it?

2 · Find the Difference 🐛

Each pair shows clean steps first, then a broken version of the same idea. Circle what's different and write one short sentence about the bug.

Pair A — The agent should place a row of 4 blocks. The loop version is much shorter — but one of these places only 1 block.

```
# clean
repeat 4 times:
  place block down
  move forward
```

```
# buggy
repeat 4 times:
  place block down
```

What is wrong? Where do all 4 blocks go in the buggy code?

Pair B — The agent should build a tower 4 blocks tall.

```
# clean
repeat 4 times:
  place block down
  move up by 1
```

```
# buggy
repeat 4 times:
  place block down
  move forward
```

What is wrong?

3 · Fill the Gap

The agent should build a row of **5 blocks** with a loop. Two parts are missing. Fill them in using the word bank.

```
repeat ____ times:  
    place block down  
    _____
```

Word bank: 5 · move forward · turn right · 2

Write the missing number and the missing line:

4 · Tell Me What You Built 📷

Now switch to your homework world. Use a loop to build a **10-block straight wall**. When you finish, come back here.

Send a photo or video of your wall, then explain what you did. Use these sentence starters — write 2 or 3 sentences.

My loop repeated ... times.

Inside the loop, the agent ...

A loop is useful because ...

5 · Record Your Walkthrough

Take a video on your phone (or a parent's phone) and show your wall. Talk like you are teaching a friend. Try to use these words: **loop**, **repeat**, **times**, **block**.

1. Show what your loop built.
2. Read your loop out loud.
3. Say why a loop is better than writing the same lines over and over.

Write what you will say in your video. You can read from it while filming.
