

M002 Week 5 — English Worksheet (Beginner)

Topic: Mini Cube Puzzle · **Course:** Maze Madness · **Level:** Beginner · **Time:** about 30 minutes

This week you finish the **mini cube**. You already have starter code that builds part of the cube. Keep the same pattern going until the cube is full — then the agent must **break a hole in the top** and climb out.

1 · Predict 🧠

Read the steps. Before you imagine the agent doing it, circle or write your answer.

```
repeat 5 times:
  place block
  move forward
```

What does the agent leave behind? Circle one: a line of blocks · a tower · a hole

How long is it?

```
break block above
move up
```

What does the agent do here? Circle one: climbs out through a hole · digs down · builds a wall

2 · Find the Difference 🐛

Each pair shows clean steps first, then a broken version of the same idea. Circle what's different and write one short sentence about the bug.

Pair A — The agent should finish the layer, **then** move up.

```
# clean
place block
place block
place block
move up
```

```
# buggy
place block
move up
place block
place block
```

What is wrong?

Pair B — To climb out, the agent must make the hole **first**, then move into it.

```
# clean
break block above
move up
```

```
# buggy
move up
break block above
```

What is wrong? What does the buggy agent bump into?

3 · Fill the Gap

At the top, the agent needs a way out. One line is missing. Fill it in using the word bank.

```
[fill the last layer]
```

```
_____
move up
```

Word bank: break block above · place block · turn right

Write the missing line:

4 · Finish the Cube 📷

Open this week's world. You will find the **mini cube starter** — some of the cube is already built.

1. Keep the **same pattern** the starter uses.
2. Repeat it until the **whole cube is filled**.
3. Make sure the agent **breaks a hole in the top** and climbs out.

When you finish, come back here. Send a photo or video of the finished cube (and the hole in the top!), then explain what you did. Use these sentence starters — write 2 or 3 sentences.

To keep building, I ...

I made the hole in the top by ...

One tricky moment was when ...

5 · Record Your Walkthrough 🎥

Take a video on your phone (or a parent's phone) while the agent builds the cube. Talk like you are teaching a friend. Try to use these words: **cube**, **layer**, **pattern**, **hole**.

1. Show the starter cube before you run your code.
2. Run your code and watch the cube fill up.
3. Show the agent breaking the hole in the top and climbing out.

Write what you will say in your video. You can read from it while filming.
