

M003 Week 1 — English Worksheet (Beginner)

Topic: First Steps with Coordinates (x, y) · **Course:** 3D Coordinates · **Level:** Beginner · **Time:** about 30 minutes

This week you draw on a flat **wall**. Every spot on the wall gets a name made of **two numbers: (x, y)**. x is how far **across**, y is how far **up**. Counting starts at **0**.

1 · Predict

Read the steps. Before you imagine it happening, circle or write your answer.

```
place gold block at (3, 0)
place gold block at (3, 5)
```

Both blocks have the same x. Do they land in the same spot? Circle one: yes · no

Why?

```
place red block at (0, 0)
```

Counting starts at 0. Is (0, 0) the bottom corner where the wall begins? Circle one: yes · no

2 · Find the Difference 🐛

Each pair shows clean steps first, then a broken version of the same idea. Circle what's different and write one short sentence about the bug.

Pair A — The block should land at **(2, 5)** — x first, then y.

```
# clean  
place gold block at (2, 5)
```

```
# buggy  
place gold block at (5, 2)
```

What is wrong? Which two numbers got mixed up?

Pair B — The block should sit at the **bottom corner**, where counting begins.

```
# clean  
place red block at (0, 0)
```

```
# buggy  
place red block at (1, 1)
```

What is wrong?

3 · Fill the Gap

The gold block should sit on the **bottom row** of the wall, where y is **zero**. One number is missing. Fill it in using the word bank.

place gold block at (4, ____)

Word bank: 0 · 1 · 4

Write the missing number:

4 · Tell Me What You Built 📷

Now switch to your homework world. Place a gold block at **(0, 0)**, then pick two more coordinates and place a block at each one. When you finish, come back here.

Send a photo or video of your blocks, then explain what you did. Use these sentence starters — write 2 or 3 sentences.

The block at **(0, 0)** shows ...

I placed a block at (... , ...) because ...

One tricky moment was when ...

5 · Record Your Walkthrough

Take a video on your phone (or a parent's phone) while you show your blocks on the wall. Talk like you are teaching a friend. Try to use these words: **coordinate**, **x**, **y**, **zero**.

1. Show the gold block at $(0, 0)$.
2. Point at one block and say its coordinate out loud.
3. Say in your own words what **x** and **y** mean.

Write what you will say in your video. You can read from it while filming.
