

M004 Week 7 — English Worksheet (Beginner)

Topic: Auto-Building Spaces — Loops + Functions + Chat Commands · **Course:** Functions & Games ·

Level: Beginner · **Time:** about 30 minutes

This week one chat command builds a **whole space by itself**. A loop repeats a room piece, and the **number** you type decides how big the space grows.

1 · Predict 🧠

Read the steps. Before you imagine the build happening, circle or write your answer.

```
on chat command "dungeon" with number rooms:
  repeat rooms times:
    build_room()
    move forward 6
```

You type **dungeon 3** . Does it build 3 rooms? Circle one: yes · no

Why?

```
on chat command "dungeon" with number rooms:
  repeat rooms times:
    build_room()
    move forward 6
```

Now you type **dungeon 1** . Does it build 3 rooms? Circle one: yes · no

2 · Find the Difference 🐛

Each pair shows clean steps first, then a broken version of the same idea. Circle what's different and write one short sentence about the bug.

Pair A — The rooms should sit in a row, not on top of each other.

```
# clean
repeat rooms times:
    build_room()
    move forward 6
```

```
# buggy
repeat rooms times:
    build_room()
```

What is wrong? Where do all the buggy rooms get built?

Pair B — The number you type should decide how many rooms get built.

```
# clean
repeat rooms times:
    build_room()
    move forward 6
```

```
# buggy
repeat 1 times:
    build_room()
    move forward 6
```

What is wrong? What happens when you type `dungeon 5` ?

3 · Fill the Gap

The number you type should decide how many rooms get built. One word is missing. Fill it in using the word bank.

```
on chat command "dungeon" with number rooms:
  repeat ____ times:
    build_room()
    move forward 6
```

Word bank: rooms · dungeon · forward

Write the missing word:

4 · Tell Me What You Built 📷

Now switch to your homework world. Make a chat command with a number that auto-builds a space. When you finish, come back here.

Send a photo or video of your space being built, then explain what you did. Use these sentence starters — write 2 or 3 sentences.

My chat command is called ...

The number decides ...

One tricky moment was when ...

5 · Record Your Walkthrough

Take a video on your phone (or a parent's phone) while your command builds the space. Talk like you are teaching a friend. Try to use these words: **chat command, number, repeat.**

1. Show the empty space, then type your command.
2. Say what the number you typed changed.
3. Say in your own words how the loop builds the space.

Write what you will say in your video. You can read from it while filming.
