

AI001 Week 2 — English Worksheet

Topic: Good Prompts vs Bad Prompts · **Course:** AI Coding with Replit Agent · **Time:** about 45 minutes

The AI does what it **reads**, not what you imagine. If your prompt is vague, the AI guesses, and the result is random. A good prompt has three things: it is **specific**, it has a **clear outcome**, and it gives **constraints** (what to do and what not to do).

1 · Predict

Read each prompt. Before the AI builds it, write what kind of result you expect — and how *sure* you are that you will get what you pictured.

Make a cool web page.

Will every student who types this get the same thing? Why or why not?

Make an about-me page.

This is better than "cool web page". But what is still missing?

Make an about-me page with three sections — name, age, and hobbies — in pastel colors.

Which of the three rules (specific / clear outcome / constraints) does this prompt use?

2 · Spot the Weak Prompt 🦎

Each prompt below is too weak to give a good result. Read what the student **wanted**, then rewrite the prompt so it is specific, has a clear outcome, and gives constraints. Then explain what was missing.

Prompt A — The student wanted a **calculator** with number buttons, the four math buttons, a result screen, and a reset button.

```
Make a calculator.
```

Hint: list the buttons and the screen. Add a color theme as a constraint.

Write a strong prompt:

What was missing from the first one?

Prompt B — The student wanted a **to-do list** page, but written in a way the AI can picture clearly.

```
Make something to write my tasks.
```

Hint: say it is a web page, name the parts (input box, add button, list), and describe how it should look.

Write a strong prompt:

What was missing from the first one?

Prompt C — The student wanted a page, but **without** a dark background and **without** tiny text (those hurt their eyes).

Make a nice page but not ugly.

Hint: "not ugly" tells the AI nothing. Use real constraints: "don't use a dark background", "don't make the text small".

Write a strong prompt:

What was missing from the first one?

3 · Three Prompts, One Task 📷

Pick **one** task — for example, "a page about my favorite animal". Write it **three ways** and run each in Replit:

1. A **bad** prompt (vague, like "make a page").
2. A **medium** prompt (a bit more detail).
3. A **good** prompt (specific + clear outcome + constraints).

Look at the three results side by side. Send a **photo or video** of the three results, then explain the difference. Use these sentence starters — write 4 to 6 sentences total.

My task was to build ...

My bad prompt was ... and the result ...

My good prompt added ... so the result ...

The biggest difference between bad and good was ...

A constraint I used was ...

Next time I will always remember to ...

4 · Rewrite "Make a Game"

For homework you will turn "**make a game**" into three levels of prompts. Plan them here first.

Level 1 (bad):

Level 2 (medium):

Level 3 (good — specific, clear outcome, constraints):

Submit 

Send this worksheet + photos (or a video) of your three results + your three prompts to teacher on KakaoTalk.
