

RB001 Week 1 — English Worksheet (Beginner)

Topic: Your First Script · **Course:** Obby Architect · **Level:** Beginner · **Time:** about 30 minutes

This week you wrote your first script in Roblox Studio. `print` sends a message to the **Output** window, and `script.Parent` is the part your script lives inside.

1 · Predict 🧐

Read the script. Before you run anything, circle or write your answer.

```
print("Hello")
print("Obby")
```

Does the Output window show `Hello` first? Circle one: yes · no

Why?

```
script.Parent.Color = Color3.fromRGB(255, 0, 0)
```

This script is inside a platform. Does the platform turn red? Circle one: yes · no

2 · Find the Difference 🐉

Each pair shows clean code first, then a broken version of the same idea. Circle what's different and write one short sentence about the bug.

Pair A — The script should print `Hello!` in the Output window.

```
-- clean  
print("Hello!")
```

```
-- buggy  
print(Hello!)
```

What is wrong?

Pair B — The script should turn the platform blue. Look at the property name very carefully.

```
-- clean  
script.Parent.Color = Color3.fromRGB(0, 0, 255)
```

```
-- buggy  
script.Parent.Colour = Color3.fromRGB(0, 0, 255)
```

What is wrong?

3 · Fill the Gap

The script should change the color of the part it lives inside. One word is missing. Fill it in using the word bank.

```
script.____.Color = Color3.fromRGB(255, 0, 0)
```

Word bank: Parent · print · Color3

Write the missing word:

The script should send a message to the Output window. One word is missing.

```
____("My obby is open!")
```

Word bank: print · Parent · script

Write the missing word:

4 · Tell Me What You Built 📷

Now switch to your own obby in Roblox Studio. Use a script to recolor your obby platforms by code. When you finish, come back here.

Send a photo or video of your recolored obby, then explain what you did. Use these sentence starters — write 2 or 3 sentences.

I changed the color with ...

My favorite color was ... because ...

One tricky moment was when ...

5 · Record Your Walkthrough 🎥

Take a video on your phone (or a parent's phone) while you show your Roblox Studio screen. Talk like you are teaching a friend. Try to use these words: **script**, **Output**, **print**, **Color3**.

1. Run the game and show your `print` message in the Output window.
2. Point at a platform your code recolored.
3. Say in your own words what `print` does.

Write what you will say in your video. You can read from it while filming.
