

RB001 Week 3 — English Worksheet (Beginner)

Topic: Functions & Events — the Lava Floor · **Course:** Obby Architect · **Level:** Beginner · **Time:** about 30 minutes

This week you learned **functions** and the **Touched event**. `lava.Touched:Connect(onTouch)` tells Roblox: "when something touches the lava, run this function."

1 · Predict 🧠

Read the script. Before you run anything, circle or write your answer.

```
local lava = script.Parent

local function onTouch(otherPart)
    print("Something touched the lava!")
end

lava.Touched:Connect(onTouch)
```

The game starts but nothing has touched the lava yet. Does the message print? Circle one: yes · no

Why?

```
local lava = script.Parent

local function onTouch(otherPart)
    local humanoid = otherPart.Parent:FindFirstChildWhichIsA("Humanoid")
    if humanoid then
        humanoid.Health = 0
    end
end

lava.Touched:Connect(onTouch)
```

A player steps on the lava. Does their health go to 0? Circle one: yes · no

2 · Find the Difference 🦎

Each pair shows clean code first, then a broken version of the same idea. Circle what's different and write one short sentence about the bug.

Pair A — The lava should print a message when touched. One line is missing in the buggy version.

```
-- clean
local lava = script.Parent

local function onTouch(otherPart)
    print("Hot!")
end

lava.Touched:Connect(onTouch)
```

```
-- buggy
local lava = script.Parent

local function onTouch(otherPart)
    print("Hot!")
end
```

What is wrong? Why does the buggy function never run?

Pair B — The lava should kill players only. The buggy version forgets the safety check.

```
-- clean
local function onTouch(otherPart)
    local humanoid = otherPart.Parent:FindFirstChildWhichIsA("Humanoid")
    if humanoid then
        humanoid.Health = 0
    end
end
```

```
-- buggy
local function onTouch(otherPart)
    local humanoid = otherPart.Parent:FindFirstChildWhichIsA("Humanoid")
    humanoid.Health = 0
end
```

What is wrong?

3 · Fill the Gap

The script should run the function when the lava is touched. One word is missing. Fill it in using the word bank.

```
lava.Touched:____(onTouch)
```

Word bank: Connect · print · local

Write the missing word:

The function needs its closing word. One word is missing.

```
local function onTouch(otherPart)  
    print("Hot!")  
    _____
```

Word bank: end · local · true

Write the missing word:

4 · Tell Me What You Built 📷

Now switch to your own obby in Roblox Studio. Build a lava floor section with a kill brick — touch the lava and your character's health drops to 0. When you finish, come back here.

Send a photo or video of your lava section, then explain what you did. Use these sentence starters — write 2 or 3 sentences.

My function runs when ...

The lava kills the player by ...

One tricky moment was when ...

5 · Record Your Walkthrough 🎥

Take a video on your phone (or a parent's phone) while a player runs your lava section. Talk like you are teaching a friend. Try to use these words: **function**, **event**, **Touched**, **Connect**.

1. Run the game and step on the lava.
2. Read your `lava.Touched:Connect(onTouch)` line out loud.
3. Say in your own words what an **event** is.

Write what you will say in your video. You can read from it while filming.
