

RB002 Week 1 — English Worksheet

Topic: Build Your World — Terrain & Anchored Models · **Course:** Story Quest · **Time:** about 45 minutes

This week you build the land for your quest world with the **Terrain Editor**, group parts into **models**, and review **Anchored**. The code below is review from RB001 — you already know all of it.

1 · Predict 🧠

Read each script. Before you imagine running it in Roblox Studio, write what you think will happen.

```
print("Welcome to Story Quest!")
print("Chapter 1: The Village")
print("Your adventure begins.")
```

Three print lines. What shows in the Output window, and in what order?

```
local signText = "The Old Village"
print(signText)
signText = "The Dark Forest"
print(signText)
```

The variable changes in the middle. What two lines print?

```
local sign = script.Parent
sign.Color = Color3.fromRGB(0, 170, 255)
sign.Color = Color3.fromRGB(255, 200, 0)
print("Sign is ready!")
```

The script sets the color two times. What color is the sign at the end? Why?

2 · Spot the Bug 🐛

Each script below was meant to do something, but it is broken. Read what the code is **supposed** to do, then rewrite it so it works. After that, explain why the original was wrong and why your fix works.

Bug A — The welcome sign should print a message, then turn green.

```
local sign = script.Parent
print("Welcome, hero!")
Sign.Color = Color3.fromRGB(0, 255, 0)
```

Write the fixed code:

Why was it wrong? Why does your fix work?

Bug B — The gate countdown should print one number per second: 3 ... 2 ... 1 ... then open. Right now all the numbers print at the same time.

```
print("3")
print("2")
print("1")
task.wait(3)
print("The gate is open!")
```

Write the fixed code:

Why was it wrong? Why does your fix work?

Bug C — The floating rock should stay in the sky above the spawn area. Right now it falls to the ground when the game starts.

```
local rock = script.Parent  
rock.Anchored = false
```

Write the fixed code:

Why was it wrong? Why does your fix work?

3 · Tell Me What You Built 📷

Now switch to your own quest world in Roblox Studio. Build your terrain and a spawn area. Group your builds into models. When you finish, come back here.

Send a photo or video of your quest world, then explain what you built. Use these sentence starters — write 4 to 6 sentences total.

My quest world is a ...

First, I made the terrain by ...

I grouped ... into a model called ...

I anchored ... so that ...

One tricky moment was when ...

If I had more time, I would ...

4 · Record Your Walkthrough 🎥

Now take a video on your phone (or a parent's phone) while you walk through your quest world. Talk through it like you are giving a tour. Try to use these words: **terrain, model, group, anchored, spawn.**

1. Show your whole world, then walk through the spawn area.
2. Point at one model and say what parts are grouped inside it.
3. Show one anchored part and say what would happen if it was not anchored.
4. Say which part of your world you are most proud of.

Write what you will say in your video. Use the space below to plan it before you record — you can read from it while filming.
