

RB003 Week 4 — English Worksheet (Beginner)

Topic: Dictionaries — Items with Keys and Values · **Course:** Tycoon Engineer · **Level:** Beginner · **Time:** about 30 minutes

This week one item holds **many facts at once** using a **dictionary** — keys like `Name` and `Price` with values after the `=`. You read a fact with a **dot**: `item.Price`.

1 · Predict 🧠

Read the script. Before you imagine running it in Roblox Studio, circle or write your answer.

```
local item = {Name = "Gold Ore", Price = 50}
print(item.Name)
```

Does it print `Gold Ore` ? Circle one: yes · no

Why?

```
local item = {Name = "Gold Ore", Price = 50}
print(item.price)
```

The key is `Price` but the script asks for `price` with a small p. Does it print `50` ? Circle one: yes · no

2 · Find the Difference 🦎

Each pair shows clean code first, then a broken version of the same idea. Circle what's different and write one short sentence about the bug.

Pair A — The key is `Price` with a **capital P**. The script should print `50`.

```
-- clean
local item = {Name = "Gold Ore", Price = 50}
print(item.Price)
```

```
-- buggy
local item = {Name = "Gold Ore", Price = 50}
print(item.price)
```

What is wrong? What does the buggy script print?

Pair B — Every key needs an `=` before its value.

```
-- clean
local item = {Name = "Gold Ore", Price = 50}
```

```
-- buggy
local item = {Name "Gold Ore", Price = 50}
```

What is wrong?

3 · Fill the Gap

The script should print the price, 50. One key is missing. Fill it in using the word bank.

```
local item = {Name = "Gold Ore", Price = 50}  
print(item.____)
```

Word bank: Price · price · Name

Write the missing key:

4 · Tell Me What You Built 📷

Now switch to Roblox Studio and open your tycoon. Make an `item` dictionary with a `Name` and a `Price`, and print both to the Output window. When you finish, come back here.

Send a photo or video of your script and the printed facts, then explain what you did. Use these sentence starters — write 2 or 3 sentences.

My dictionary stores ...

I used a dot to ...

One tricky moment was when ...

5 · Record Your Walkthrough 🎥

Take a video on your phone (or a parent's phone) while you run your script. Talk like you are teaching a friend. Try to use these words: **dictionary**, **key**, **value**, **dot**.

1. Show your **item** dictionary in the script.
2. Press Play and show the name and price printed in the Output window.
3. Say in your own words what a **key** and a **value** are.

Write what you will say in your video. You can read from it while filming.
