

RB004 Week 5 — English Worksheet (Beginner)

Topic: Power-Ups — Speed Pads with task.delay · **Course:** Arena Legends · **Level:** Beginner · **Time:** about 30 minutes

This week you built a **power-up**: a speed pad that makes a player faster for a few seconds.

`task.delay` means "do this later, but don't stop the script."

1 · Predict 🧠

Read the script. Before you imagine running it in Roblox Studio, circle or write your answer.

```
pad.Touched:Connect(function(hit)
    local humanoid = hit.Parent:FindFirstChild("Humanoid")
    if humanoid then
        humanoid.WalkSpeed = 32
    end
end)
```

A player steps on the pad. Does the player get faster? Circle one: yes · no

Why?

```
humanoid.WalkSpeed = 32
task.delay(5, function()
    humanoid.WalkSpeed = 16
end)
```

Is the player still fast after 10 seconds? Circle one: yes · no

2 · Find the Difference 🐛

Each pair shows clean code first, then a broken version of the same idea. Circle what's different and write one short sentence about the bug.

Pair A — The boost should go back to normal **after 5 seconds**.

```
-- clean
humanoid.WalkSpeed = 32
task.delay(5, function()
    humanoid.WalkSpeed = 16
end)
```

```
-- buggy
humanoid.WalkSpeed = 32
```

What is wrong? How long does the buggy boost last?

Pair B — The pad should hide, then **come back after 10 seconds**.

```
-- clean
pad.Transparency = 1
pad.CanCollide = false
task.wait(10)
pad.Transparency = 0
pad.CanCollide = true
```

```
-- buggy
pad.Transparency = 1
pad.CanCollide = false
```

What is wrong?

3 · Fill the Gap

The script should make the player faster. One word is missing. Fill it in using the word bank.

```
if humanoid then  
    humanoid.____ = 32  
end
```

Word bank: WalkSpeed · Transparency · Touched

Write the missing word:

4 · Tell Me What You Built 📷

Now open your arena in Roblox Studio. Build a speed pad that boosts a player, then resets after 5 seconds. When you finish, come back here.

Send a photo or video of your power-up working, then explain what you did. Use these sentence starters — write 2 or 3 sentences.

When a player touches the pad, ...

I used **task.delay** so that ...

One tricky moment was when ...

5 · Record Your Walkthrough 🎥

Take a video on your phone (or a parent's phone) while you playtest your power-up in Roblox Studio. Talk like you are teaching a friend. Try to use these words: **Touched**, **WalkSpeed**, **task.delay**.

1. Show your speed pad, then press Play.
2. Step on the pad and show how fast you run.
3. Say in your own words what **task.delay** does.

Write what you will say in your video. You can read from it while filming.
