

WD003 Week 2 — English Worksheet

Topic: Page Structure — HTML Sections · **Course:** Portfolio Site · **Time:** about 45 minutes

This week you turn last week's paper plan into **real HTML**. You use meaningful tags — `<nav>`, `<section>`, `<footer>` — and give each section an `id` so the nav menu can jump to it. No colors yet. This week is all about **structure**.

Remember: `id="about"` on a section, and `href="#about"` on a nav link, work as a pair. The `#` link finds the matching `id` and jumps there.

1 · Predict 🧠

Read each block of HTML. Before you imagine the page, write what you think will happen.

```
<nav>
  <a href="#projects">Projects</a>
</nav>

<section id="projects">
  <h2>Projects</h2>
</section>
```

A visitor clicks the "Projects" link. What happens, and why?

```
<section id="about">
  <h2>About</h2>
</section>

<section id="contact">
  <h2>Contact</h2>
</section>
```

There are two sections here. How does the browser know where one ends and the next begins?

```
<nav>
  <a href="#hero">Home</a>
  <a href="#contact">Contact</a>
</nav>

<section id="hero"><h1>Minjun</h1></section>
<section id="about"><h2>About</h2></section>
```

The nav has a "Contact" link, but there is no `id="contact"` anywhere on the page. What happens when you click it?

2 · Spot the Bug 🐛

Each block of HTML below was meant to do something, but it is broken. Read what the code is **supposed** to do, then rewrite it so it works. After that, explain why the original was wrong and why your fix works.

Bug A — The nav link is supposed to jump to the About section, but clicking it does nothing.

```
<nav>
  <a href="about">About</a>
</nav>

<section id="about">
  <h2>About</h2>
</section>
```

Hint: an `id` link needs one small symbol in front.

Write the fixed code:

Why was it wrong? Why does your fix work?

Bug B — Each section is supposed to have a *different* `id` so the nav can tell them apart. Right now two sections share the same one.

```
<section id="section">
  <h2>About</h2>
</section>

<section id="section">
  <h2>Projects</h2>
</section>
```

Hint: an `id` is a name. Two things should not share the same name.

Write the fixed code:

Why was it wrong? Why does your fix work?

Bug C — This page is supposed to have a navigation bar, but the link is floating loose with no `<nav>` around it, and the section never closes.

```
<a href="#hero">Home</a>

<section id="hero">
  <h1>My Name</h1>
```

Hint: wrap the link, and close the tag you opened.

Write the fixed code:

Why was it wrong? Why does your fix work?

3 · Build Your Sections

Open your editor and build the **five sections** from your Week 1 plan as real HTML. No design yet — placeholder text is fine.

1. Add a `<nav>` with four links: Home, About, Projects, Contact.
2. Add five blocks: a Hero `<section>`, an About `<section>`, a Projects `<section>`, a Contact `<section>`, and a `<footer>`.
3. Give each section a matching `id` so the nav links jump to them.
4. Put a placeholder heading in each section so you can see where you are.

When you finish, click each nav link and watch the page jump. Send a **photo or video** of your result (the page, or your code), then explain what you did. Use these sentence starters — write 4 to 6 sentences total.

First, I looked at my Week 1 plan and ...

I gave each section an `id` so that ...

When I clicked a nav link, the page ...

One link did not work at first because ...

To fix it, I ...

Next week I want to start on ...

4 · Record Your Walkthrough 🎥

Now take a video on your phone (or a parent's phone) while you click through your page. Talk through it like you are teaching someone who has never seen HTML. Try to use these words: **section**, **nav**, **id**, **link**, **footer**.

1. Show your page from top to bottom.
2. Click a nav link and show the page jumping to that section.
3. Read one section's `id` and the matching `href` out loud, and say how they pair up.
4. Show one bug you hit and how you fixed it.

Write what you will say in your video. Use the space below to plan it before you record — you can read from it while filming.
