

M004 Week 2 — English Worksheet (Beginner)

Topic: Chat Commands · **Course:** Functions & Games · **Level:** Beginner · **Time:** about 30 minutes

This week you type a word in chat and your code runs. A **chat command** can take a number with it — `tower 5` builds a 5-block tower.

1 · Predict 🧠

Read the steps. Before you imagine the agent doing it, circle or write your answer.

```
on chat command "bridge":
  repeat 6 times:
    place block
    move forward
```

You type `bridge` in chat. Does the agent build the bridge? Circle one: yes · no

Why?

```
on chat command "tower" with number n:
  repeat n times:
    place block
    move up
```

You type `tower 4`. Is the tower 4 blocks tall? Circle one: yes · no

2 · Find the Difference 🐛

Each pair shows clean steps first, then a broken version of the same idea. Circle what's different and write one short sentence about the bug.

Pair A — Typing `bridge` should run the code. The command **name** must match what you type.

```
# clean
on chat command "bridge":
  repeat 6 times:
    place block
    move forward
```

```
# buggy
on chat command "brige":
  repeat 6 times:
    place block
    move forward
```

What is wrong? Why does nothing run when you type `bridge` ?

Pair B — The number from chat should go **into** the function.

```
# clean
on chat command "tower" with number n:
  build_tower(n)
```

```
# buggy
on chat command "tower" with number n:
  build_tower(3)
```

What is wrong?

3 · Fill the Gap

Typing `tower 5` should build a 5-block tower. One word is missing. Fill it in using the word bank.

```
on chat command "tower" with number n:  
  repeat ____ times:  
    place block  
    move up
```

Word bank: `n` · `tower` · `chat`

Write the missing word:

4 · Tell Me What You Built 📷

Now switch to your homework world. Make one chat command with a number that builds something. When you finish, come back here.

Send a photo or video of your command running, then explain what you did. Use these sentence starters — write 2 or 3 sentences.

When I typed my command in chat, ...

My command's number was used for ...

One tricky moment was when ...

5 · Record Your Walkthrough

Take a video on your phone (or a parent's phone) while you type your command and the code runs. Talk like you are teaching a friend. Try to use these words: **chat command**, **number**, **run**.

1. Show the chat box and type your command.
2. Show what the code builds.
3. Say in your own words what a **chat command** does.

Write what you will say in your video. You can read from it while filming.
