

▼ M001 Week 6 — English Worksheet (Beginner)

Topic: Inverted Pyramid · **Course:** Pyramid Problems · **Level:** Beginner · **Time:** about 30 minutes

An **inverted** pyramid is upside down: the **smallest** layer is at the bottom and the **biggest** is at the top.

1 · Predict 🧠

Read the steps. Before you imagine the agent doing it, circle or write your answer.

```
set size to 1
while size <= 5:
    [build one size × size square layer]
    move up by 1
    set size to size + 2
```

Each new layer gets ... Circle one: bigger · smaller

Where is the widest layer — bottom or top?

```
set size to 1
while size <= 5:
    [build one size × size square layer]
    move up by 1
    set size to size + 2
```

The layers go 1, then ..., then ... Write the three sizes from bottom to top.

2 · Find the Difference 🐉

Each pair shows clean steps first, then a broken version of the same idea. Circle what's different and write one short sentence about the bug.

Pair A — The pyramid should be **inverted**: it starts small and grows.

```
# clean
set size to 1
while size <= 5:
    [build layer]
    move up by 1
    set size to size + 2
```

```
# buggy
set size to 5
while size > 0:
    [build layer]
    move up by 1
    set size to size - 2
```

What is wrong? What shape does the buggy code build instead?

Pair B — Each layer must sit **on top** of the one below.

```
# clean
while size <= 5:
    [build layer]
    move up by 1
    set size to size + 2
```

```
# buggy
while size <= 5:
    [build layer]
    set size to size + 2
```

What is wrong?

3 · Fill the Gap

The inverted pyramid should **grow** by 2 each layer. One line is missing. Fill it in using the word bank.

```
set size to 1
while size <= 5:
    [build layer]
    move up by 1
    _____
```

Word bank: set size to size + 2 · set size to size - 2 · turn right

Write the missing line:

4 · Tell Me What You Built 📷

Now switch to your homework world. Build an inverted pyramid that grows from **size 1 up to size 5**. Look at it from the side to check the shape. When you finish, come back here.

Send a photo or video of your pyramid, then explain what you did. Use these sentence starters — write 2 or 3 sentences.

The top layer is ... blocks long.

Each new layer grows by ...

Compared to last week's pyramid, this one is ...

5 · Record Your Walkthrough 🎥

Take a video on your phone (or a parent's phone) and walk the camera around your inverted pyramid. Talk like you are teaching a friend. Try to use these words: **inverted**, **layer**, **size**, **grow**.

1. Show that the top is the widest part.
2. Say the sizes of the layers from bottom to top.
3. Compare it to last week's normal pyramid.

Write what you will say in your video. You can read from it while filming.
