

M000 Week 7 — English Worksheet

Topic: Farm House (House + Adjacent Farm) · **Course:** Builder Basics · **Time:** about 45 minutes

1 · Predict 🧠

Read each set of steps. Before you imagine the agent doing it, write what you think will happen.

```
set size to 3
set height to 2

repeat height times:
  repeat 4 times:
    repeat size times:
      place block down
      move forward
    turn right
  move up by 1
```

What does the agent build? How tall is it?

```
set size to 3

repeat size times:
  repeat size times:
    place block down
    move forward
  turn right
  move forward
  turn right
  repeat size times:
    move forward
  turn left
  turn left
```

What shape does the agent leave on the ground? What is it for in a farm house?

```
move down by 2
turn right
repeat 4 times:
    move forward
turn left
```

The agent just finished a house. Where is it going next?

2 · Spot the Bug 🐛

Each block of code below was meant to do something, but it is broken. Read what the code is **supposed** to do, then rewrite it so it works. After that, explain why the original was wrong and why your fix works.

Bug A — The agent is supposed to build the **house walls first**, then the **farm patch beside it** (two clear stages).

```
# Stage 1: farm patch
repeat 3 times:
    repeat 3 times:
        place block down
        move forward
    turn right
# Stage 2: house walls
repeat 2 times:
    repeat 4 times:
        repeat 3 times:
            place block down
            move forward
        turn right
    move up by 1
```

Write the fixed code:

Why was the order wrong? Why does your fix work?

Bug B — The agent is supposed to walk to the spot beside the house, **then** build the farm patch. The farm should land on the ground, not on top of the house.

```
repeat 3 times:
  repeat 3 times:
    place block down
    move forward
  turn right
move down by 2
```

Write the fixed code:

Why was it wrong? Why does your fix work?

Bug C — The agent is supposed to use the **same** **size** **variable** for the house walls and the farm patch, so changing one number changes both.

```
repeat 4 times:
  repeat 3 times:
    place block down
    move forward
  turn right
# farm patch
repeat 5 times:
  repeat 5 times:
    place block down
    move forward
  turn right
```

Write the fixed code using one **size** variable:

Why was it wrong? Why does your fix work?

3 · Tell Me What You Built 📷

Now switch to your homework world. Build your farm house — small house with walls and roof, plus a farm patch beside it. Try making the farm bigger (5×5) **or** add a path between the house and farm. When you finish, come back here.

Send a photo or video of your farm house, then explain what you did. Use these sentence starters — write 4 to 6 sentences total.

First, I built the house walls by ...

Then I built the roof by ...

To get to the farm spot, the agent had to ...

The farm patch is ... blocks wide.

The hardest part was ...

If I had more time, I would ...

4 · Record Your Walkthrough 🎥

Now take a video on your phone (or a parent's phone) while you walk the camera around your farm house. Talk through it like you are teaching someone who has never seen it. Try to use these words: **walls, roof, farm, patch, stage.**

1. Show the house, then walk over to the farm patch.
2. Read your house loops and farm loops out loud and say what each stage does.
3. Show one bug you hit and how you fixed it.
4. Say how big the house is and how big the farm is.

Write what you will say in your video. Use the space below to plan it before you record — you can read from it while filming.
