

M002 Week 6 — English Worksheet

Topic: Redstone Levers and Mazes · **Course:** Maze Madness · **Time:** about 45 minutes

This week the maze has **redstone levers**. Your agent **flips a lever** to open a closed redstone door, then walks through to clear the maze.

1 · Predict 🧠

Read each set of steps. Before you imagine the agent doing it, write what you think will happen.

```
move forward
interact ahead
move forward
```

The agent moves up to a lever, flips it, then moves forward. What happens to the door?

```
interact ahead
move forward
move forward
```

There is no lever in front of the agent. What happens?

```
while no lever ahead:
    move forward
interact ahead
turn right
move forward
move forward
```

Describe in plain English what the agent is doing, step by step.

2 · Spot the Bug 🐛

Each block of code below was meant to do something, but it is broken. Read what the code is **supposed** to do, then rewrite it so it works. After that, explain why the original was wrong and why your fix works.

Bug A — The agent is supposed to **flip the lever first**, then walk through the now-open door.

```
move forward
move forward
interact ahead
```

Hint: the lever is at the first wall. Flip it before passing.

Write the fixed code:

Why was it wrong? Why does your fix work?

Bug B — Before flipping a lever, the agent should be **right in front of it**.

```
while no lever ahead:
    move forward
    interact ahead
```

Hint: the agent is interacting on every step, even when there is no lever.

Write the fixed code:

Why was it wrong? Why does your fix work?

Bug C — After flipping the lever, the agent should **turn around** and go back through the door.

```
interact ahead  
move forward
```

Hint: the door is behind the agent, not in front.

Write the fixed code:

Why was it wrong? Why does your fix work?

3 · Tell Me What You Built 📷

Now switch to your homework world. The maze has a **lever** that opens a **closed door**. Write code that:

1. moves the agent to the lever,
2. flips it (**interact**),
3. moves on through the now-open door,
4. reaches the goal.

When you finish, come back here. Send a photo or video of the agent reaching the end, then explain what you did. Use these sentence starters — write 4 to 6 sentences total.

First, I walked the agent to ...

I used `interact` to ...

Once the door opened, the agent ...

The hardest part was ...

To fix it, I ...

If I had more time, I would ...

4 · Record Your Walkthrough 🎥

Now take a video on your phone (or a parent's phone) while the agent runs the maze. Talk through it like you are teaching someone who has never seen it. Try to use these words: **lever**, **interact**, **flip**, **door**, **open**.

1. Show the closed door and the lever in the maze.
2. Run your code and show the agent flipping the lever.
3. Read your code out loud and say which line opens the door.
4. Show one bug you hit and how you fixed it.

Write what you will say in your video. Use the space below to plan it before you record — you can read from it while filming.
