

M003 Extension 2 — English Worksheet

Topic: Pixel-Art Mob Heads (x, y) · **Course:** 3D Coordinates · **Level:** Extension (after Week 3) · **Time:** about 45 minutes

Copy **two mob heads** with (x, y) — a **creeper** and a **piglin**. x is **across**, y is **up**. Both heads already stand in front of you in the world — look at them, then build yours from the grid.

● Stand on your **home spot** (red block) every run. Move your feet, move your picture.

1 · Predict 🧠

Read each set. Write what you will see.

```
place green block at (4, 11)
place green block at (5, 11)
place green block at (10, 11)
place green block at (11, 11)
```

Creeper eyes. One line, or two pairs?

```
place black block at (6, 6)
place black block at (6, 7)
place black block at (6, 8)
place black block at (6, 9)
```

All share x = 6. Across or up? Which number changes?

```
place green block at (6, 8)
place black block at (6, 8)
```

Same (x, y). Green, black, or both? Why?

2 · Spot the Bug 🐛

Fix each one. Then say why it was wrong.

Bug A — Creeper eyes should be (4, 11) and (10, 11). Both land in the same spot.

```
place black block at (4, 11)
place black block at (4, 11)
```

Fixed code:

Why wrong? Why does your fix work?

Bug B — Piglin eye should be (5, 10). The numbers are swapped.

```
place dark block at (10, 5)
```

Fixed code:

Why wrong? Why does your fix work?

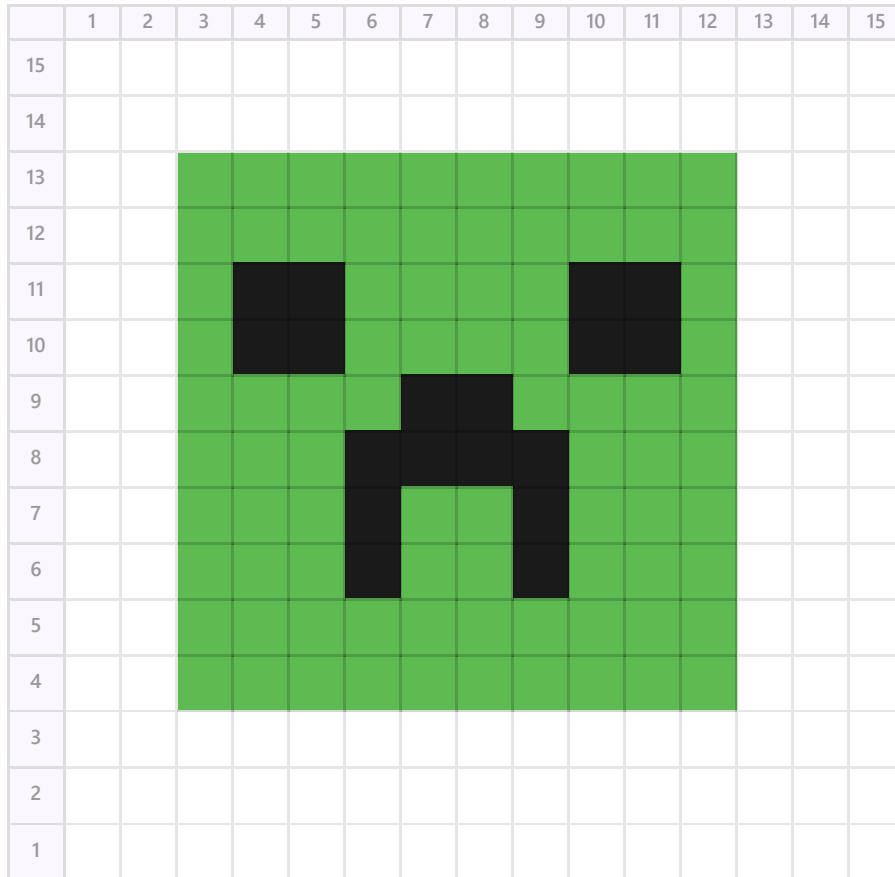

Bug C — Code is correct, but the creeper came out two blocks too high.

```
(the code matched the grid)
```

What did your friend forget before pressing run?

Pick **one** head. Read each colored square's (x, y) and build it. Top numbers = **x**, side numbers = **y**.
Done early? Build the other.

● Creeper (green · #5dbb52, face · black)

 **Piglin** (pink · #e89ba0, snout · #f4c4bf, eyes/nose · dark)

Send a photo. Then finish these — 4 to 6 sentences.

I built the ...

The lowest block is at $(x = \dots, y = \dots)$.

For a row I changed the ... number; to go up I changed the ... number.

The hardest square to read was ...

Once my picture was wrong because ...

Next time I would ...

4 · Record Your Walkthrough

Film yourself showing your head. Use these words: **x, y, coordinate, across, up, home spot.**

1. Show your home spot. Why stand on it every time?
2. Show your head from the front.
3. Point at one block: "this one is at x ..., y ...".
4. Show one block you fixed.

Plan what you will say:
