

RB001 Week 7 — English Worksheet (Beginner)

Topic: Build Week — Your Full Obby · **Course:** Obby Architect · **Level:** Beginner · **Time:** about 30 minutes

No new syntax this week. You put everything together: lava, doors, vanishing platforms, coins, and a win pad — one full obby.

1 · Predict 🧠

Read the script. Before you imagine running it in Studio, circle or write your answer.

```
local winPad = script.Parent

winPad.Touched:Connect(function(otherPart)
    local humanoid = otherPart.Parent:FindFirstChildWhichIsA("Humanoid")
    if humanoid then
        print("You win!")
        for i = 1, 6 do
            winPad.Color = Color3.fromRGB(255, 215, 0)
            task.wait(0.2)
            winPad.Color = Color3.fromRGB(85, 255, 127)
            task.wait(0.2)
        end
    end
end)
```

A player jumps on the win pad. Does the pad flash colors? Circle one: yes · no

Why?

```
local lava = script.Parent

lava.Touched:Connect(function(otherPart)
    local humanoid = otherPart.Parent:FindFirstChildWhichIsA("Humanoid")
    if humanoid then
        humanoid.Health = 0
    end
end)
```

A loose block falls onto the lava. The block has no Humanoid. Does anything happen? Circle one: yes · no

2 · Find the Difference 🐉

Each pair shows a clean script first, then a broken version of the same idea. Circle what's different and write one short sentence about the bug.

Pair A — The win pad should only celebrate for a **player**.

```
-- clean
winPad.Touched:Connect(function(otherPart)
    local humanoid = otherPart.Parent:FindFirstChildWhichIsA("Humanoid")
    if humanoid then
        print("You win!")
    end
end)
```

```
-- buggy
winPad.Touched:Connect(function(otherPart)
    print("You win!")
end)
```

What is wrong? When does the buggy pad say "You win!" too early?

Pair B — The door should open: invisible **and** walk-through.

```
-- clean
if humanoid then
    door.Transparency = 1
    door.CanCollide = false
end
```

```
-- buggy
if humanoid then
    door.Transparency = 1
end
```

What is wrong?

3 · Fill the Gap

The win pad needs to find the player's Humanoid. One word is missing. Fill it in using the word bank.

```
local humanoid = otherPart.Parent:FindFirstChildWhichIsA("_____")
if humanoid then
    print("You win!")
end
```

Word bank: Humanoid · Head · Part

Write the missing word:

4 · Tell Me What You Built 📷

Now build your full obby in Roblox Studio: a start, at least 2 sections, 1 checkpoint (SpawnLocation), and a win pad at the end. Beat it yourself in Play mode. When you finish, come back here.

Send a photo or video of your finished obby, then explain what you built. Use these sentence starters — write 2 or 3 sentences.

My obby has ... sections: ...

The hardest part is ...

My checkpoint is at ...

5 · Record Your Walkthrough 🎥

Take a video on your phone (or a parent's phone) while you playtest your obby from start to finish. Talk like you are teaching a friend. Try to use these words: **section**, **checkpoint**, **win**.

1. Play through every section and show each one can be beaten.
2. Fall once on purpose and show the checkpoint works.
3. Touch the win pad and say what your win-pad script does.

Write what you will say in your video. You can read from it while filming.
