

M000 Pre-Lesson — Get Comfy in Minecraft

Topic: Moving & Building · **Course:** Builder Basics · **Time:** about 30 minutes

This is a warm-up **before Lesson 1**. No coding yet. The goal is to get comfortable playing Minecraft — moving around and placing blocks — so Lesson 1 feels easy. Open your Minecraft world and have fun.

1 · Move Around

Get into your world and try each move. Tick the box when you can do it.

- ☐ Walk forward, back, left, and right
- ☐ Look around by moving the mouse
- ☐ Jump
- ☐ Look up at the sky, then down at the ground
- ☐ Walk up onto a hill or a block

On a computer: walk with **W A S D**, look with the **mouse**, jump with the **space bar**.

Which move was the trickiest? Write one sentence.

2 · Break and Place Blocks

Now change the world a little. Tick each one.

- ☐ Break one block (dig it away)
- ☐ Place one block
- ☐ Open your inventory and pick a new kind of block
- ☐ Build a small tower 3 blocks tall
- ☐ Break your tower back down

Which block did you like the most? Write one sentence.

3 · Build a House 🏠

Now build a small house by hand. Any size is fine — it does not need to be perfect. Your house needs **4 things**:

- ☐ Four walls
- ☐ A door you can walk through
- ☐ Two windows (use glass, or leave two holes)
- ☐ A roof on top

Take your time and try different blocks.

Send a photo of your finished house to your teacher. Then finish these sentences — write 3 or 4.

My house is made of ...

The door is on the ...

My favourite part is ...

The hardest part was ...

5 · Show Me Around 📹

Take a short video walking around your house. Talk like you are showing a friend. Try to use these words: **walls, door, window, roof**.

1. Walk up to your house.
2. Show the door and walk inside.
3. Point to the windows and the roof.

Write what you will say in your video. You can read from it while filming.
