

M000 Week 2 — English Worksheet (Intermediate)

Topic: Placing Blocks · **Course:** Builder Basics · **Level:** Intermediate · **Time:** about 38 minutes

1 · Predict 🧠

Read each set of steps. Before you imagine the agent doing it, write what you think will happen.

```
place block down
move forward
place block down
move forward
place block down
```

How many blocks did the agent place, and what shape do they make?

```
move up by 1
place block down
move up by 1
place block down
```

Are these blocks in a line on the ground, or stacked? Write one sentence saying how you know.

```
place block down
turn right
move forward
place block down
```

Where is the second block compared to the first one? Explain.

2 · Spot the Bug 🐛

Each block of code below is broken. You are told the goal first, then a hint about where to look. Read the code, then rewrite it so it works. After that, write one sentence explaining what was wrong.

Bug A — Goal: place a block, move forward, then place another block. Hint: look at the very first line — is the agent placing before it moves?

```
move forward  
place block down  
move forward
```

Write the fixed code:

What was wrong?

Bug B — Goal: place a row of 3 blocks in a straight line. Hint: the agent never moves, so the blocks all land in the same spot.

```
place block down  
place block down  
place block down
```

Write the fixed code:

What was wrong?

Bug C — Goal: place 2 blocks stacked on top of each other. Hint: `move forward` and `move up by`
1 do not do the same thing.

```
place block down  
move forward  
place block down
```

Write the fixed code:

What was wrong?

3 · Tell Me What You Built 📷

Now switch to your homework world. Place **4 blocks** — make some in a line and some stacked, so your build has more than one shape. When you finish, come back here.

Send a photo or video of what you placed, then explain what you did. Use these sentence starters — write 3 or 4 sentences total.

First, I used the command ... to place the block.

Then I moved ... so the next block would land ...

To make the blocks stack, I ...

The hardest part was ...

4 · Record Your Walkthrough

Now take a video on your phone (or a parent's phone) while you walk the camera through your world. Talk through it like you are teaching someone who has never seen it. Try to use these words: **place, block, move, forward, up.**

1. Show the blocks you placed.
2. Read your commands out loud and say what each one does.
3. Point out where the blocks are stacked and explain how you did it.

Write what you will say in your video. Plan it here before you record — you can read from it while filming.
