

M000 Week 3 — English Worksheet (Intermediate)

Topic: Bridge Building · **Course:** Builder Basics · **Level:** Intermediate · **Time:** about 38 minutes

1 · Predict 🧠

Read each set of steps. Before you imagine the agent doing it, write what you think will happen.

```
repeat 4 times:
  place block down
  move forward
```

What does the agent build? Write one sentence.

```
repeat 6 times:
  place block down
  move forward
```

The gap below the agent is 6 blocks wide. Does the bridge reach the other side? Explain how you know.

2 · Find the Bug 🐛

Each code block was meant to do something, but it is broken. The goal is written first, so you know what the agent should do. Read it, then write one or two sentences explaining what is wrong.

Bug A — The agent should build a bridge that is exactly **5 blocks long**.

```
repeat 4 times:
  place block down
  move forward
```

What is wrong, and what number would fix it?

Bug B — The agent should lay 4 blocks in a flat line, next to each other.

```
repeat 4 times:
  place block down
  move up by 1
```

What is wrong? What should the agent do instead of "move up by 1"?

Bug C — The agent should place a block, then step forward, over and over, to make a bridge.

```
repeat 5 times:
  move forward
  place block down
```

Hint: think about the order of the two lines inside the loop.

What goes wrong when the agent moves before it places? Explain.

3 · Fix the Code

The agent should build a bridge **6 blocks long** using a loop, with the blocks in a flat line. The code below has two problems. Rewrite it so it works.

```
repeat 4 times:
  place block down
  move up by 1
```

Write the fixed code:

Why does your version work? Write one sentence.

4 · Tell Me What You Built 📷

Now switch to your homework world. Build a **bridge across the river or cliff** using a loop. When you finish, come back here.

Send a photo or video of your bridge, then explain what you did. Use these sentence starters — write 3 or 4 sentences.

First, I ...

I used a loop to ...

My bridge is ... blocks long.

The hardest part was ...

5 · Record Your Walkthrough 🎥

Take a video on your phone (or a parent's phone) and walk the camera across your bridge. Talk through it like you are teaching someone who has never seen it. Try to use these words: **loop**, **repeat**, **block**, **bridge**.

1. Show one end of the bridge and walk across it.
2. Read your loop out loud and say what it does.
3. Say how many blocks long your bridge is.

Write what you will say in your video. Plan it here first — you can read from it while filming.
